

Furkan Smail

UI/UX Designer

Eindhoven, Netherlands | furkanmusa2@gmail.com | (359) 878 426 278

PROFILE

UX/UI design student with end-to-end product experience - from user research and competitive analysis through wireframing, prototyping, and validated hi-fi design - most recently as the sole UX/UI designer on a cross-platform mobile app for Consulink B.V. Comfortable working in Agile/SCRUM environments and collaborating directly with clients, mentors, and stakeholders.

SKILLS

UX/UI: Wireframing, Prototyping, User & Expert Interviews, A/B Testing, Competitive Analysis, User Journey Mapping, Design Thinking, Double Diamond Methodology, MoSCoW Prioritization

Tools: Figma, Adobe Suite, Microsoft Teams, Trello, Monday

Technical: HTML, CSS, Tailwind, JavaScript, React Native, Expo, React, Python, Blender

Version Control: Git, GitHub - <https://github.com/fawer1>

Ways of Working: Agile/SCRUM, Cross-functional Collaboration

EXPERIENCE

UX/UI Design & App Development Intern - Consulink *Feb 2025 - Jun 2025*

- Led end-to-end UX/UI design of a cross-platform mobile app as the sole designer on the project, independently running the full Double Diamond process from research through validated hi-fi design.
- Conducted expert and stakeholder interviews and competitive analysis, synthesizing findings into personas, journey maps, and a MoSCoW-prioritized feature set to guide design decisions.
- Validated design iterations through A/B testing and structured feedback loops with colleagues and mentors, refining the UI across multiple rounds before development handoff.
- Built core app screens in React Native (Expo), integrating Consulink's live API to power real-time features, and used GitHub daily for version control and sprint task tracking within a SCRUM workflow.
- Delivered a near-production-ready app as the sole designer and developer on the project, earning strong positive feedback from mentor and faculty supervisor.

UX/UI Designer - Client Project (Equine Integration) *Sep 2025 - Jan 2026*

- Served as primary client and stakeholder contact for a 5-month dashboard design project, coordinating meetings, feedback loops, and communication across the design team, client, and faculty.
- Conducted user interviews, a literature review, and competitive analysis to define needs across five hybrid professional roles, uncovering low technical literacy as a critical design constraint.
- Applied an iterative Design Thinking process to design a role-based, widget-driven dashboard consolidating three separate data sources into a single interface built around five core wellbeing metrics.
- Challenged and reversed an initial mobile-first assumption in favor of a desktop-first platform strategy, validating the decision through direct client and expert interviews.
- Delivered an interactive, clickable Figma prototype refined through usability testing and multiple stakeholder validation rounds, accompanied by a developer-facing advice report for implementation handoff.

EDUCATION

BA, ICT & Media Design (Expected 2027) - Fontys University of Applied Sciences, Eindhoven *2022 - 2027*

- Coursework in UX/UI design, prototyping, and user-centered design methods.
- Applied tools including Figma, React, JavaScript and Vite across studio projects.

Minor Abroad - Dankook University, South Korea

Highschool Diploma - Drujba Schools, Sofia, Bulgaria

LANGUAGES

English (Excellent), Turkish (Native), Bulgarian (Native), Korean (Intermediate)
